

R. Register, E. Davidson, M. Shayegan, S. Datta et al. (Princeton)

Learn. Explore. Play!

Over 200 people from the broader Princeton community (home to many Spanish-speaking families) attended In this family-oriented **bilingual program**, held in November 2022. PCCM invited the public to explore science with Princeton University researchers. With many table-top activities focusing on materials science and nanoscience, families interacted with Spanish and English speaking scientists and engineers who study and manipulate materials on the nanoscale. Participants learned what PCCM scientists are doing with computers, polymers and even diamonds! Over 25 volunteers from Princeton included PCCM faculty (Register, Shayegan, Davidson, Datta, Rand, Moini and students/postdocs from the Stone, Nelson, Schoop and Yazdani groups.)
