

RESEARCH EXPERIENCE FOR UNDERGRADUATES (REU) 2022

6:30pm - 7:15pm: Group 1 will stand by their posters and present

7:15pm - 8:00pm: Group 2 will stand by their posters and present

After two years of having to put one of the most anticipated undergraduate summer programs on pause due to COVID-related restrictions, in June of 2022, PCCM opened its doors again and hosted 9 REU students from 7 different states/territories (ranging from Puerto Rico to California to Idaho and more)!

The students conducted research with their assigned professors, and graduate/post-doctorate mentors, selected based off of their scientific interests. The 9-week REU program focused on a wide range of Materials Science topics where the students gained guidance through the departments of Physics, Chemistry, Molecular Biology, Chemical Engineering, Electrical Engineering, Mechanical and Aerospace Engineering, and Civil and Environmental Engineering.

The 9 REU students attend weekly seminars and are consistently conducting research in the labs alongside the guidance of their mentors. At the end of the REU program on August 4th, the 9 REU students will be given the chance to present their research on a 30"x40" or 36x48 inch poster board during the programs final evening, "REU 2022 Poster Night Session" in front of PCCM Staff, professors and their graduate/post-doc. mentors with the possibility of a student or two getting their research professionally published!

Social Time/Light Reception

Time: 6:00pm - 6:15pm

Location: Bowen Hall Atrium

Caterer: *Business Bistro*

MENU

Appetizers:

- Bourbon Meatballs
- Cheese & Crackers (vegetarian)
