

# Spring into Science: Materials Science Day 2015

Education: Dan Steinberg

Princeton Center for Complex Materials (DMR 1420541)

## A New All-Ages Interdisciplinary Workshop Draws More Than 300 Families, While Engaging Researchers, Professors, and Students Alike

The public was invited to Frick Chemistry Laboratory on Saturday, April 18, for "Spring into Science: Materials Science Day". Nearly 500 people attended this free program and met with Princeton University materials scientists, engineers, graduate students and undergraduates to learn how materials science and technology impacts their lives. This dynamic day of hands-on activities included polymers, bouncing batteries, sustainable concrete and many other demos from over 50 PCCM volunteers and their partners.
